## The Conservation Pledge

*I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.*

## Dirty Politics

It is ironic that the federal *United States Department of Agriculture* (USDA) and the federal *Environmental Protection Agency* (EPA) approve DOW AGRISCIENCE'S "Enlist" duo package. In other words the federal agencies under the *Obama Administration* think it is perfectly alright for USA citizens to be ENLISTED into the next worse level of *malnourishment* and over-exposure to *toxic chemical residues* in food.

The ENLISTMENT means Ag Tech's corn, soy, and sugar produced by genetic engineering will contain residues of both **Glyphosate** and **Dow 2, 4-D**.

GMO crops are addicted to *Glyphosate*, the main ingredient in *Round Up* and other herbicides. *Glyphosate* makes minerals bio-unavailable causing malnourishment.

Dow 2, 4-D is the main ingredient of *Agent Orange*, and it contains CHOLINE SALT that is *unapproved* as a weed killer. The exposure will be six or seven times worse.

## Societal Collapse Disorder

It's not just colony collapse disorder of the bees, it is also societal collapse disorder because half of all USA citizens are expected to get cancer. That is too high a price to pay.

Your *uninformed* consent to depopulation of the *American People* is what costs too much!

Your cotton clothing may even have been enlisted. And if being ENLISTED by **Dow Chemical's profiteers** weren't bad enough, the USDA is also on the verge of approving MONSANTO for *Dicamba use*. This is despite the fact that the American People already show symptoms of overexposure to chemical pollutants.

Denying the public the right to know what is in their food degrades the human spirit. To not label GMOs in the United States of America (USA) means the human choice and free will of the American People are being jilted. Capitalism has turned oligarchic and the USA food system is despotic toward citizenry.

.....

Everything democracy has achieved could go right down the BAYER, BASF, DOW, DUPONT, MONSANTO and SYNGENTA drain hole if corporate profiteers continue to swindle voters into thinking food prices in America would rise if U.S. citizens voted in favor of labeling GMO food in grocery stores here. Big Money is used as “*free speech*” to buy advertising farce by the opponents of labeling.

### The Best Option and Choice

The BEST way to solve the food transparency problem is to imagine how totally all other global human rights issues hinge upon labeling GMO food in CANADA and the UNITED STATES OF AMERICA before other human rights also are denied.

The multimillionaire transnational chemical corporations patented seeds, and if you get the gist next up is patented human genome. You might not have noticed who might patent people. Such special privilege as patenting life forms implies the elite have rights, not for the plebes.

Sterility of the population will favor artificial insemination “*free enterprise*”, but ownership of human genes is a slippery slope. If you eat patented food or receive patented human genes, do the patent holders own you as a vessel, like a ship. Is “*citizenship*” their new euphemism for human slavery, aka human ownership.

### The Codex Alimentarius

There are no FDA safeguards in America, but *Codex Alimentarius* has decided it is alright to label GMO food.

### It's Time to Kick Ass

The bottom line is that every man, woman, and child deserves to be able to make an informed choice. *The Truth about Genetic Engineering* is what you should know about the food you eat.

Disclosure, of course, is the bane of the GMO food manufacturing business. But such important matters cannot be left to “*self-regulation*” policies. U.S. citizens must simply demand to know what you are consuming.

Unsubstantiated safety claims were made about cigarettes while many died of lung cancer before cigarettes were labeled. The discovery of heavy GMO crop cross-pollination and toxic chemical pollution of America's air, soil, and water by Industrial farming and manufacturing processes is a revelation.

It is also a revelation that rats fed GMO food develop breast cancer, and breast cancer is the second most common cancer among American women. *Do the math*. What if breast cancer deaths in the USA could have been prevented by labeling GMO food. People can, you know, find ways to make these changes comfortably and easily.

*Food Produced by Genetic Engineering* commandeers other species genes, those of bacteria, fungus, parasites, and viruses that wouldn't be in you if gene pollution hadn't been allowed to food. GMO food invades into the most jealously guarded recess of your being.

*Moms All Across America* want to know about GMOs in order for American Women to procure the necessary safeguards for their health and the wellbeing of their families.

### Take the Scales Off Your Eyes

And it is now well-documented that GMOs neither resist drought, nor do they produce greater yield.

Over five billion pounds of chemical poisons have been sprayed on your food, crops, parks, and schoolyards since GMOs were introduced in 1996. Farmers report having to use *more* bug and weed killers than before. The use of toxic chemicals has increased by 527 million pounds.

Furthermore one third of all children in the USA now suffer from ADHD, FOOD ALLERGIES, ASTHMA, AUTISM, AUTOIMMUNE DISORDERS, BEHAVIORAL, or OBESITY issues. CHILDHOOD CANCER and CHILDHOOD DIABETES are on the rise in AMERICA since the GMO food onslaught. The children are being made susceptible to more diseases and illnesses.

### Who Should Be Held Accountable

It is now common knowledge that a growing number of doctors correlate inflammation in the gut with GMO food. CANCER, INFERTILITY, and STOMACH ULCERS are linked to the third generation. Grandmothers and others, the grandchildren are being weakened.

There were no long-term studies conducted when the GMO food was unleashed upon the entire American Population in 1996. The GMO food was a gamble. AMERICA's *Food and Drug Administration* (FDA) lacks independent review and relies on in-house voluntary research supplied by the very Corporations that develop the GMOs. It appears that the FDA can't help the citizenry because it looks like the FDA is in the habit of doing whatever Monsanto and their allies say.

### The FDA Jerks

*Big Pharma* is having a heyday but should remember that global citizens everywhere oppose Draconian concepts of no accountability. Therefore it would be most appropriate for CONGRESS to man up and just decide to require GMO labeling in order to harmonize with the many trading partners who disapprove of GMOs.

The FDA doesn't *have* to play Dodge ball, they *want* to. That makes them crooks, along with Monsanto and their allies, doesn't it. Isn't it time to get the whole batch of them out of Dodge and put in federal regulators who actually care about taking responsibility for the ill results they cause here and abroad.

### A Tidal Wave of Distain

Dear Readers, it has been said to think globally but act locally. For all you Ashlanders, here is the list of service clubs and community organizations in Ashland, OREGON.

American Association of University Women (AAUW) 541.261.2197  
Ashland Masonic Lodge #23AF&AM, 541.482.2875  
BPOE Elks Club 944 541.482.3911  
Community Services for Volunteer Program 541.482.5211  
Kiwanis Club 541.488.8065  
Lions Club 541.482.0841  
Osher Lifelong Learning Institute (OLLI) 541.552.6048  
Rotary Club of Ashland 541.621.7036  
Rotary club of Ashland-Lithia Springs 541.482.4496  
Soroptimist International 541.482.6288

It's up to you to ask them to show the documentary films mentioned in past issues of The *Eco-Community Dialogues Newsletters* and ask their members to participate in the annual Vigil March on May 21.

The annual worldwide MARCH AGAINST MONSANTO and their allies is an international HUMAN RIGHTS solidarity event. Every year on May 21, global citizens around the world march in solidarity against food totalitarianism.

The GMO-free *movement* is a tidal wave encircling the EARTH. Consumer concern may prevail against synthetic biology *bull* as has already occurred in 64-other countries and some counties in the USA are awakening. Labeling GMO food is not just about the right to know. It is about the Light to know. Enlightenment requires transparency.

Monsanto and their allies believe the "Right to Farm" means the right to harm small family farmers. But the UNITED NATIONS disagrees and international human rights for family farmers and the soil will eventually have to be complied with. The Frankenfood profiteers with their patent infringement lawsuits against family farmers amounts to land grabs and it is time to label their soil strategy as out to "Get", not "Give".

### Selfish Motives Exposed

The selfish motive behind the tantrum over labeling Genetically Engineered groceries is that the giant chemical corporations and their grocery supply chain of GMO food suppliers are afraid. They fear that if you knew the truth about the **politics of Genetically Modified Organisms (GMO food)**, then some of their profits might be lost. That is what is meant when the bio-profiteers claim “*It costs too much*” to label human food in the supermarkets.

*Genetically Modified Organisms* in the UNITED STATES OF AMERICA (USA) grocery stores come from biopharmaceutical GMO seed. Every cell of these plants produced by Big Pharma chemical corporations could contain drugs, enzymes, medicine, and/or vaccines, as well as bacteria-viruses-fungus infection carriers, and one or more transgenic genes. GMO food may be altering your human RNA.

In addition to that information that consumers should have the right to know, the GMO foods contain toxic chemical residues and these are on the increase because the GMO crops have attracted superbugs and superweeds, meaning ever-increasing amounts of poisonous biocides will be sold by the chemical profiteers who patented these Frankenfoods. This Holiday Season is a good time to dispel the Monsanto Claus myths.

### Get a Mitt and Get in the Game

*Eco-Community Dialogues* newsletters are a FREE community service, available by request, at the *A Street Print & Parcel* across from ACE hardware, in Ashland, OREGON. The print shop only charges for paper and ink, or will download the entire PDF file of current and back issues onto people's flash drives to read off their computers and save paper and ink. It's up to you to provide your own flash drive.
